PROFESSIONAL SUMMARY

Passionate developer with a knack for problem-solving and innovation. Experienced in PHP, MySQL, JavaScript, WordPress, Linux, GitHub, Figma, and Python. Proficient in creating efficient solutions: designed GitPass, a secure password manager, and automated Elite Logistics' package tracking system.

Currently pursuing a Bachelor's in Computer Applications, I've crafted personal websites, built a Multi-User To-Do app in Laravel, and developed projects like a Daily Gold Price Scraping Website and a Podcast Site for Kurakahani Podcast, integrating cronjobs and GitHub Actions.

Eager to immerse myself in industry best practices, I bring a creative problem-solving mindset, passion for programming, and effective communication skills. All my projects are accessible on my GitHub and LinkedIn profiles, showcasing my abilities. Excited to contribute my full-stack skills to innovative projects, I am ready to make a meaningful impact in any development role.
